

RE: Reference Letter for Dr. George Yan P. Eng.

To Whom It May Concern,

When I first met George about 18 years ago, he was the Consultant/Strategic Advisor to the Company that eventually acquired the business of which I was the President.

Since then George has worked with me and my Management Team on numerous business development, strategic planning and R&D projects.

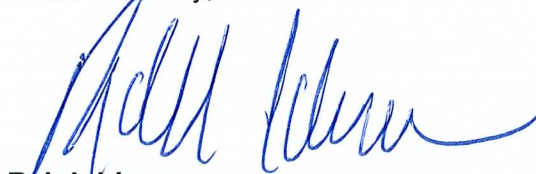

Together with myself, Chris Bolton and George, we are co-inventors of a Video Display System, assigned to Vertigo Digital Displays. The US patent 8472174B2 was issued on June 25, 2013 and is a critical IP of Vertigo.

In addition to his technical expertise, George has considerable business experience, especially in facilitating the interflow of businesses and investments between Canada and China.

I am very pleased with the results of his efforts in all the assignments that I gave him and expect that he will continue to advise me and my Management Team.

George would be a great asset to any top level strategic planning team.

Yours sincerely,

Ralph Idems

Co-Founder & Chief Operating Officer
Vertigo Digital Displays
